

WHO WE ARE?

ICY DOCK is a privately held company with more than 24 years of experience in designing, manufacturing, branding and distributing computer data storage and enclosure peripherals, especially in industrial and rugged computer data storage. ICY DOCK became a global leader in the computer data storage industry, utilizing their designing and manufacturing capability since 1997. Adhering to strict manufacturing guidelines and having creative product designing teams in California, USA, ICY DOCK delivers highest quality products to exceed customer expectation and offers one of a kind product to satisfy customer's need.

VISION:

As one of the leading computer data storage provider, we believe our innovations will revolutionize computer data storage by bringing new design and form factor into the market. It will provide improvements and convenience in computer data management for small businesses, government, industrial, military, and medical industry.

VALUE:

20-year Design Experience

- Distinctive product ID design.
- Product development team located in California, USA.
- Various USA patented products from ICY DOCK's original design.

Quality, Reliability, and Convenience

- Long product lifecycle with an average of more than ten years.
- Industry leading 3-year warranty for all ICY DOCK products.
- Offer removable drive functionality, hot-swap capabilities, and modular designs; aiming for user convenience in the computer data storage field.

Flexibility

- Ability to make revisions to our designs to fit the needs of system integrators, manufacturers, and government.

Service

- Strategically incorporated branch offices throughout the world to provide immediate support to local customers.
- Various customer service options include phone support, e-mail support, and live chat support, and we reply to all customer support e-mails by the end of our business day.

Removable Drive Caddy Design

Both ICY DOCK internal and external hard drive enclosures have the **REMOVABLE(HOT-SWAP)** function in drive caddy or Tray-less design

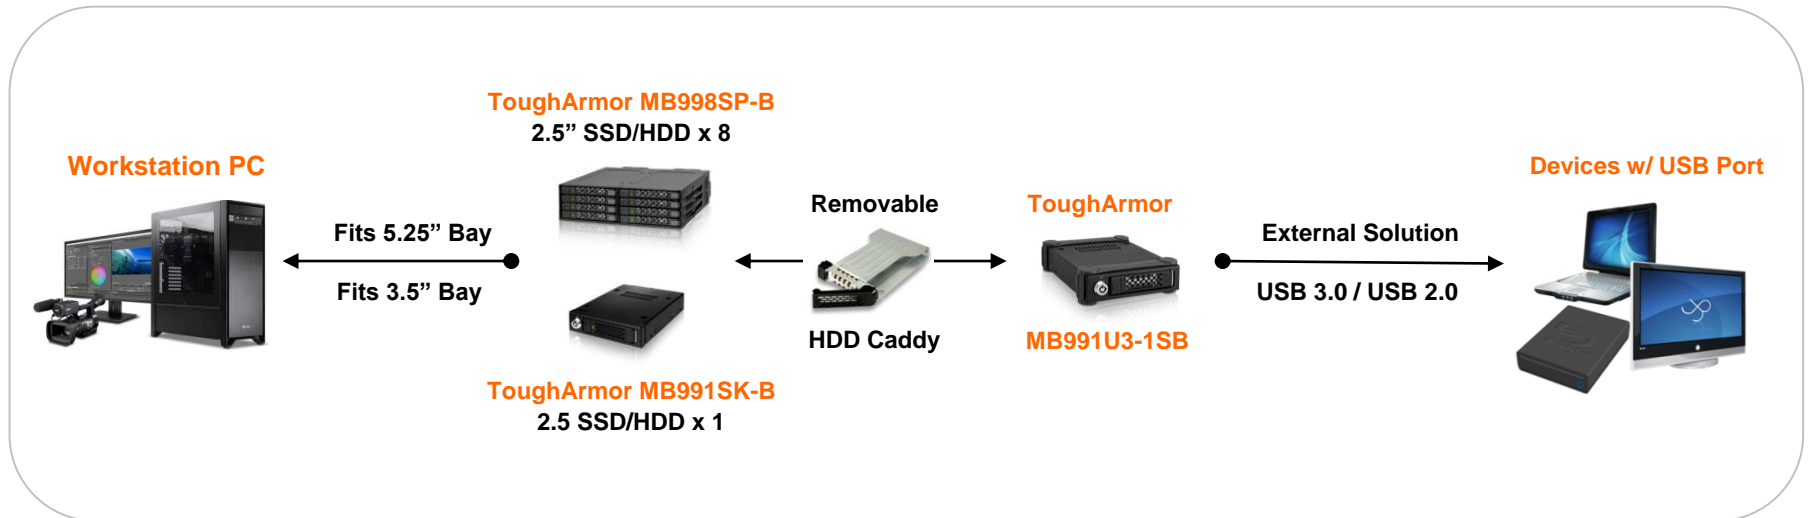

Key Features of REMOVABLE Design:

- **Supports drive Hot-Swap function**
- **Direct bare drive swaps require no tool or installation for our Tray-less series**
- **Cost efficient by using the same enclosure for new hard drive(s) upgrades**
- **Removable design features “Grab and go” as well as “plug and play”**
- **Saves valuable desk/workspace**
- **Choose from a variety of your favorite SSD or hard drive brands and models**
- **Allows for easy drive maintenance without opening up the chassis**

Flexible

As long as you're equipped with ICY DOCK HDD enclosures in your systems, you can transfer storage drives between systems, especially when required to work between locations such as home, work, or school. And drive maintenance will be a breeze too!

Reliable

With more than 24 years of design and manufacturing experience, ICY DOCK has revolutionized the art of hard drive mobility with innovative concepts and simplicity. Quality assurance is our key priority in manufacturing. It allows deployment of ICY DOCK products in many tier one companies such as HP, DELL, Google and more. Our products have long product life cycles, a beneficial factor that ICY DOCK embraces. This factor contributes into many industries that are seeking stability in product availability.

In partnership with

ADVANTECH

SAMSUNG

FOXCONN

Unique Design

We design and produce ICY DOCK products with:

1. Distinctive ID design
2. Top of the line quality (we manufacture our products & choose quality material)
3. Unique functionality such as removable/tool-less features
4. Ability to make revisions to our designs to fit the needs of system integrators, manufacturers, and government

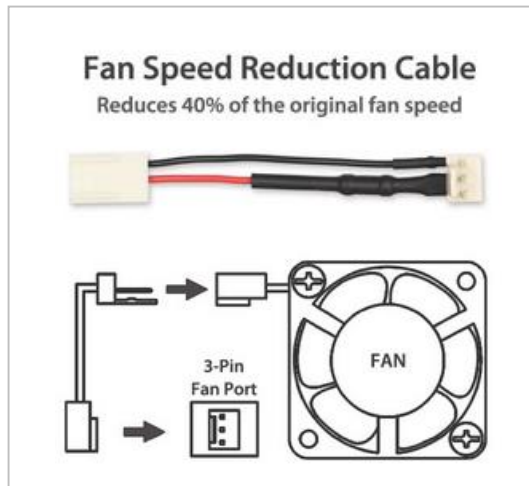

Elegant

When creating unique hard drive enclosures, our designers have spent countless hours on design and structure. Our products do not compromise functionality due to small sizes and strikes a balance between space and functionality under the premise of simplicity.

Complete

When designing new products, we care about the complete user experience, from simple-to-follow installation guides in its packing to operational usage.

Green

All ICY DOCK products are **RoHS compliant**. Also, our material and components used are certified by REACH. We source our material and manufacture our product responsibly.

Service

Global Service

Not like many other companies, ICY DOCK handles all customer service and technical support at our office located in sunny southern California. We also handle most technical support and customer service issues from Canada, Mexico, South America, Asia and Europe.

Various Customer Service Options

We provides various customer service options such as phone support, e-mail support and live chat support, and we reply to all customer support e-mails by the end of our business day.

Online RMA Submission

We provide online RMA submission for your convenience, allowing us to issue an RMA number by the end of our business day. This helps to cut down turn around time, especially when the product is essential to daily operations. (Some companies refuse to provide repair/replacement services since they are not in USA)

Limited 3-year Warranty for All Products

All the ICY DOCK products are covered with a 3-year warranty.

ICY DOCK Blogger, Twitter, Youtube and Facebook

We are the first storage enclosure manufacturer to connect to these social sites. We like to have direct contact with our users, that way we are able to collect real world feedback and suggestions on new products to make, as well as improvements to our existing ones.

EZConvert 2.5" SSD to 3.5" SATA Converter Adapters

- The USA patented tool-less drive installation design for quick & easy setup
- All connections, dimensions, and mounting holes are exactly the same as 3.5" HDD
- Adapts any 2.5" SATA SSD or HDD for use in any 3.5" drive bay or drive tray without performance reduction

Suggested Applications:

Replace legacy 3.5" hard drive with 2.5" SSD for Desktop PC, Mac, Workstation, Server, Data Center, and any systems that use 3.5" hard drive

Upgrade your system in 30 seconds with USA patented tool-less drive installation design

Why EZConvert?

Approved and used by first tier companies:

ICY DOCK EZConvert SSD adapters earns their reputation from many first tier companies who values ICY DOCK's product quality, three year warranty, long product life, and professionally trained worldwide customer support.

What makes EZConvert Special?

ICY DOCK EZConvert series 2.5" to 3.5" SSD mounting adapters set themselves apart from other competitors by having various advanced features that greatly enhance user's experience such as tool-less drive installation, full drive height support, hot-swap drives within the drive caddy, hardware RAID functionality, and SAS 3.0 compatibility.

EZ-FIT & FLEX-FIT Multifunction Mounting Brackets

- Mounts up to 4x 2.5" SATA drives + 1x Slim ODD in a single 5.25" drive bay of the system
- Tool-less Drive Installation Design - Drive is fully removable and can be installed or swapped without using a tool
- Accommodate various storage devices such as slim ODD, 2.5"/3.5" drives/device, in a standard 3.5" or 5.25" bay

Suggested Applications:

Install additional drive and device within a standard 3.5"/5.25" drive bay of Gaming PC, Desktop PC, Workstation, Rackmount, and Industrial PC systems

ToughArmor Rugged 2.5" SSD/HDD Enclosures

- Rugged full metal construction from inside out, which is compliant with flammability requirements
- Drive caddy is full removable & hot-swappable for peace of mind system maintenance
- Fits up to 3x 2.5" SSD in a single 3.5" bay (floppy bay) or up to 8x 2.5" drives in a single 5.25" bay (DVD bay)

Suggested Applications:

Embedded system, automation system, in-vehicle computer, rugged system HPC, workstation PC, server system, data center, medical and military computers

ToughArmor Series

Why ToughArmor?

RUGGED METAL FRAME

- Ruggedized full metal construction
- Ideal for flammability and heavy duty usage
- Sized to fit into any Slim ODD, 5.25" bay, or 3.5" drive bay

Interchangeable

EZ-Slide Drive Caddy

REMOVABLE DRIVE CADDY

- Rugged metal EZ-Slide drive caddy provides removability, security, and durability

VARIOUS APPLICATIONS

- Allows flexible data storage builds for different types of applications
- Design for enterprise PC, industrial PC, embedded system, and SFF system
- Approved & used by Advantech, GE, HP, Nvidia, and other well known companies

ICY DOCK 3.5" HDD Removable HDD Enclosures

- **Hot-Swap capability** - Allow you to remove or add drives while the system is running. It's designed for gaming, DVR, back-up, video and server application
- **User friendly features**- Designed for your convenience such as individual drive power button & tray-less design
- **Drive interchangeability** – The drives can be interchanged from system to system or internal to external

Suggested Application: Gaming System, Back-up System, Drive Duplicator, IPC, DVR, HTPC System

Tray-Less Solution for quick and easy maintenance. Good for system or application that requires hot-swap. Such as DVR device, HTPC, HDD duplicator, or daily backup system.

Tray Solution provides the drive with a fully enclosed protection, support half-height hard drives, provides the maximum reliability and extended life span. Good for server application that requires the best reliability, easy maintenance and drive compatibility with small tower server, IPC or data center.

Awards

"The Icy Dock MB994IPO-3SB opens up small form factor systems to more storage without ODD sacrifice."
- hitechlegion.com

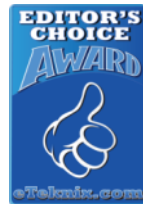

"This is a great idea if you are looking to make the use of the limited space you may have"
- Wegotserved.com

"The ExpressCage is an essential accessory for those who plan to build a server or a NAS at home"
- xtremehardware.com

"The MB994SP-4SB-1 could simplify things even further, especially for system builders who need to swap out multiple drives constantly."
- hitechlegion.com

"On the whole I am very impressed with the MB994SP-4SB-1. Its build quality and functionality is well worth every penny /cent."
- eteknix.com

"The MB994SP has many things going for it. Not only is a sleek looking solution to keeping all your 2.5" drives in one convenient location, but it also cools them and keeps them safe."
- thinkcomputers.org

"It's quite obvious that the MB991IK-B was not just designed to be a typical mobile rack to be used in server rooms".
- hitechlegion.com

"The Icy Dock MB991IK-B comes with full support for SATA 6G and works very well with solid state drives without the loss of performance. very good in just about every area"
- thinkcomputers.org

"With the Icy Dock reading 5° C lower than the passively cooled Thermaltake BlacX 5G. it is a definite winner at keeping a drive cooler."
- techreaction.net

Not only does it meet that goal, it does so in a high-quality and highly durable fit and finish
- pcper.com

"ICY DOCK products have always featured a very good price/performance ration and the ICYRaid is no different"
- nikktech.com

A nice, simple two bay RAID enclosure that is quiet and easy to configure.
- pcper.com
