

• Installing the device

Step 1 How to open / close the front

1.1 Push the mark located at the right rim of front door to eject. (Fig. 1-1)

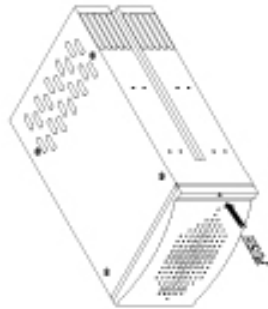

Fig. 1-1

1.2 Turn the panel in the direction indicated by the arrow to close the front panel. (Fig. 1-2)

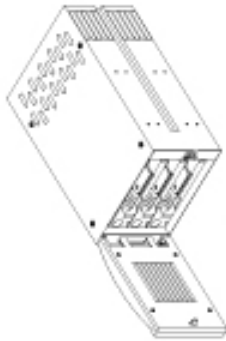

Fig. 1-2

CLOSE

Step 3 Installing HDD to the Removable Carrier

3.1 Connect the hard drive to the cable connector and the power connector located at the rear of the cartridge. (Fig. 3-1)

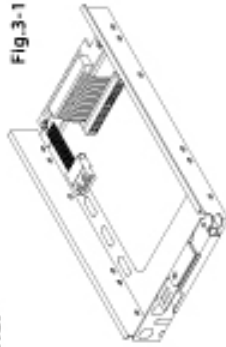

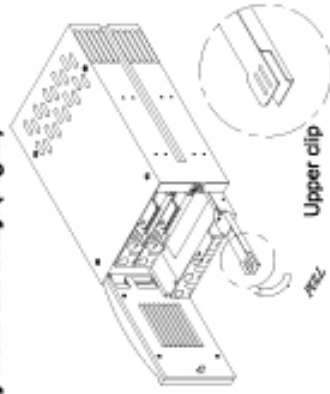

Fig. 3-1

Step 2 Removing the cartridge away from the body. (Fig. 2)

2.1 Slightly press down the upper clip of the handle.

2.2 Pull the handle out horizontally to be angled 90° from cartridge to release from body.

2.3 Pull to slide out the cartridge.

Upper clip

Fig. 2

3.2 Fasten hard drive by placing hard drive onto the cartridge. Position the two rear mounting holes of the hard drive to the holes "a" located at the two sides of cartridge. Then use the four screws provided to tightly secure the hard drive. (Fig. 3-2)

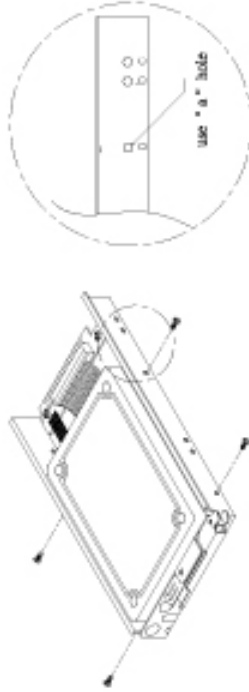

Fig. 3-2

Step 4 Inserting the cartridge along with drive into the body (Fig. 4)

4.1 Match the two sides of the cartridge to the rails located at the two sides inside the body.

4.2 Keep the handle angled at 90° from the cartridge, then slide the cartridge along the rails and into the body until fully inserted.

4.3 Push the handle towards the front of cartridge until a "click" sound is made to completely secure the position of cartridge.

4.4 Close the front door to complete the hard drive installation. (Fig. 5)
