

# EZConvert 2.5" to 3.5" SSD/HDD Converter Kit

## Why ICY DOCK SSD Converter?

In 2008, we released the world's first 2.5" to 3.5" SSD/HDD converter to provide our customer the ability to use their 2.5" SSD in their 3.5" HDD system. As SSD technology becomes more and more popular, we constantly strive to improve our EZConvert series to meet today's standard, such as 7mm to 15mm drive height support and SAS dual channel support while keeping the physical dimensions, mounting holes and connections the same as standard 3.5" SATA drive.

## Huge System Upgrade in 30 Seconds

Utilizing an SSD can greatly enhance system performance, and is truly the future of the data storage industry. With our SSD converters, system builders can help their client quickly and easily make the transition without changing their entire system. With our USA patented tool-less drive installation design, drives can be installed and removed in a matter of seconds. Also, we have several converter models to choose from and each of them has their own uniqueness to fit customer's preference. Currently, many system builders have already accepted the convenience of **EZConvert series**. And that is why many of the computer industry giants are already using our products in their critical applications.

## Key Product Features:

- Converts any standard 2.5" SAS or SATA SSD & HDD to a 3.5" SAS or SATA drive (varies by model listed below)
- Support **SATA 6Gbps** or **SAS 2.0** with no speed reduction (varies by model listed below)
- Support latest 2.5" SAS or SATA SSD & HDD from **7mm to 15mm** (varies by model listed below)
- **USA Patented tool-less design** for quick & easy drive installation and maintenance
- Compatible with any standard 3.5" SAS or SATA drive bay, backplane, enclosure & mobile racks
- Full metal construction from the inside out, which is perfect for rugged applications and compliant to flammability requirements (\*EZConvert Pro series)
- Stainless steel body with open air design for rapid heat dissipation (EZConvert Air / EZConvert Air Lite series)
- **Approved & used by Tier 1 companies such as HP, Intel and Google**
- **Covered by 3 year warranty with global customer support**
- Manufacturer direct support - provided by ICY DOCK

## EZ-Convert Series Highlights

### EZConvert Pro MB982 Series

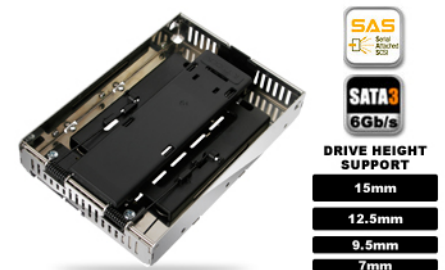

Full metal design for rugged/enterprise integration with complete covered designed for maximum drive protection

### EZConvert MB882 Series

Auto drive engaging design for easy drive installation and multiple air vents for increased air circulation

### EZConvert Air MB382/MB482 Series

Flexible drive stabilizing arm for all drive height compatibility and completely opened top in a metal chassis for maximum cooling performance

## Sample Applications for EZ-Convert Series:

EZConvert Pro MB982IP – 2.5” to 3.5” SAS HDD conversion

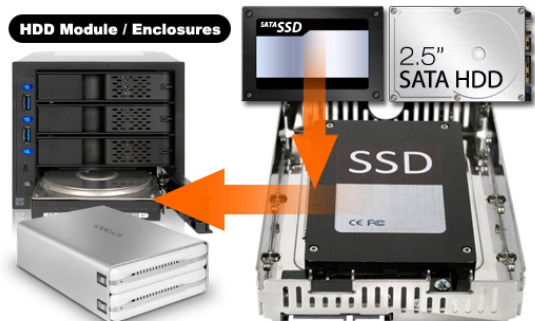

EZConvert MB882SP-1S-1B – 2.5” to 3.5” SATA SSD conversion

EZConvert Air MB382SP – 2.5” to 3.5” SATA HDD/SSD conversion

EZConvert Air Lite MB482SP – 2.5” to 3.5” SATA HDD/SSD conversion
