

## ICY DOCK Compatibility Test Report Tekram TR-384A with Icy Dock MB561US-4S

Our objective for this compatibility test is to confirm that our Tekram TR-834a controller cards are fully compatible with Icy Dock's MB561US-4S enclosure. We will be focusing on our controller and the enclosure's ability to handle Hot Plug and Hot Swap as stated within Icy Dock's manual.

### **Test Equipment:**

Motherboard: DFI NF4 Ultra-D

Memory: 1GB DDR PC3200 RAM

CPU: AMD 246 Athlon 64 Processor 3200+

Hard drives tested:

- Seagate Barracuda ES SATA ST3750640NS (4x)
- Western Digital Raptor WD740ASF-00NLR0 (4X)

Enclosure: Icy Dock 4 drive enclosure MB561US-4S

RAID controllers: Tekram TR834a

### **Setup:**

Setup is very simple with our controller cards. All you need to do is to connect all power cables and SATA cables accordingly to the enclosure.

### **Test Results:**

Hot Swappable:	<b>OK</b>
Hot Plug:	<b>OK</b>
Activity LED blinks Amber:	Not Applicable
Power LED constant Green:	Not Applicable
Fault LED:	Not Applicable

### **Conclusion:**

Tekram TR-834a is fully compatible with Icy Docks MB561US-4S enclosure with the following drives tested above.
