<3.>Installation Guide

3-1.Pull the active handle of the tray until
segment C (refer to 2-2). Press the adjoining
section of the active handle and handle pulling
the handle to remove the tray from the external
housing.
Push the release latch to remove the top
cover by sliding backwards.

HDD

MK (SATA HDD)

3-2.Place the HDD inside the tray and connect
the interface and power connectors to the HDD.
Secure the HDD to the tray using the screws
provided (check the accessory bag). Place the
top cover back to the tray.Slide forward to secure.
In case of SATA HDD,slide the HDD backwards
for connection to the tray.
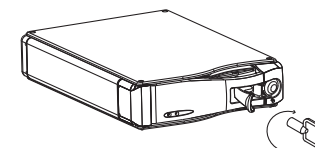

3-3.Insert the tray into the external housing and close
the handle. Use the miniature key provided to
secure the handle (refer to 2-5).
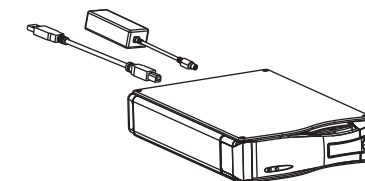

3-4. Connect the interface and power connectors
to the external housing and to the source.
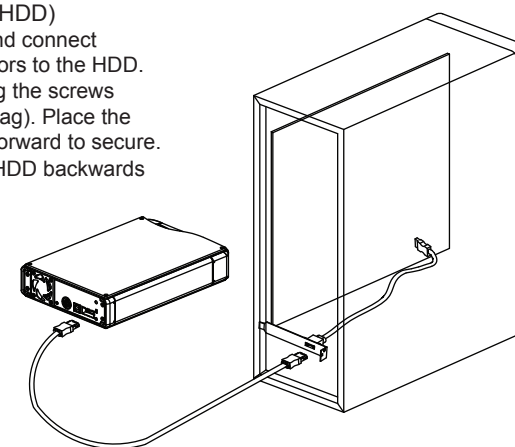

3-5. Optional 1 port eSATA PCI bracket w/ internal
cables installation utilizing the MB452MK devic.
