## BRACKET SERIES

### What is ICY DOCK Storage Mounting Bracket?

It is a mounting bracket specially designed to accommodate multiple 2.5" laptop drives or solid state drives (SSD), slim optical drive, and 3.5" HDD or device, utilizing the standard internal 3.5" hard drive bay or external 5.25" bay. ICY DOCK's mounting bracket comes in different models, and each model has a different amount of drive/device bays to help you create various storage device setup while saving the system space. For example, you can fit up to 3x 2.5" SSD in a single 3.5" HDD bay with EZ-Fit Trio MB610SP SSD bracket. Or you can fit both slim ODD and a 3.5" drive/device in a single 5.25" bay with FLEX-FIT Duo MB343SPO bracket. Our storage mounting bracket features tool-less drive installation design, which is perfect for gamers, power users, and system builders who need to install multiple storage devices in the system with limited system space, without a time-consuming drive installation process!

### Key Product Features

- Approved & used by the first-tier brand such as Micron
- Drives are fully removable and can be installed or swapped without using a tool
- Fits up to 3x 2.5" hard drive or SSD in a single 3.5" HDD bay for space saving (MB610SP)
- Accommodate various storage devices such as slim ODD, 2.5"/3.5" drives/device, in a standard 3.5" or 5.25" bay
- One-piece construction with industrial grade ABS for long-lasting durability
- Advance drive guiding mechanism & stabilizer provide smooth drive installation
- Industry leading 3-year warranty with exceptional customer support via phone, email, or live chat

### Various Applications for ICY DOCK Mounting Brackets

#### Flash-based SSD 2.5" Storage System

Replace the legacy 3.5" HDD with up to 3x 2.5" SSD (7mm), without replacing the system chassis

*\*Quickly install massive SSD to the 3.5" form factor drive system without dealing with hassle drive installation*

#### RAID Protected Compact Server

Fits 2x hot-swappable 2.5" SSD/HDD plus 1x 3.5" HDD in a single external 5.25" bay

*\*Set 2x 2.5" SSD/HDD in RAID 1 for OS, and use 1x 3.5" HDD as a storage drive. All within a 5.25" bay space*

#### Rugged Workstation or Server

Fits 2x 2.5" SSD/HDD in a single 3.5" HDD bay, with rugged full metal MB082SP bracket

*\*Quickly install 2x standard 2.5" SSD/HDD to a rugged system without dealing with hassle drive installation*

#### Media Workstation System

Fits 1x Blu-ray/DVD writer plus 1x multimedia card reader in a single external 5.25" bay

*\*Space-saving design allows you combine optical disk drive plus media card reader within a 5.25" DVD bay*
